

# Biogenesisia Company Profile

Starter PDF for website download, outreach, and partnership conversations.

Research-driven portfolio

Pentahelix collaboration

Company-ready presentation

## Company profile / Profil singkat

Biogenesisia presents itself as an innovation and collaboration platform for research-driven bio-based products, raw materials, health products, and downstream technology pathways based on Indonesia bio-resources.

## Why this upgraded website matters

This Version 2 package is designed to make the website easier to trust, easier to scan, and more useful for product discovery, initial partnership outreach, and company-profile sharing. It adds a more premium homepage, richer product visuals, downloadable PDF collateral, and a PHP-ready inquiry flow.

## Ecosystem & collaboration

The current positioning highlights a pentahelix ecosystem involving academia, industry, government & regulator, community, and media & investors. Collaboration models include joint R&D, licensing, contract manufacturing, co-branding, distribution, and sustainability-oriented programs.

## Commercial use of this package

The package is structured for simple hosting upload. Product visuals can be replaced later with original packshots without changing the page structure. The contact form can run on PHP-enabled hosting; if mail() is restricted by the host, the handler can be switched to SMTP later.

## Portfolio snapshot

Product	Status	Category	Short note
Biosachi	Commercial	Raw Materials	Refined Sacha Inchi oil for pharmaceutical and cosmetic grade applications as a strategic ingredient for cosmetics, nutraceuticals, and functional food.
Cubratin	Commercial	Health Products	Phytochemical supplement based on curcumin, brazilin, and mangostin with an integrated pharmaceutical research approach for antioxidant and anti-inflammatory positioning.

Product	Status	Category	Short note
Cubratin Pros	Commercial	Health Products	An advanced Cubratin variant with more standardized active-material specifications for more intensive medical / supportive-therapy positioning.
Creya	Commercial	Health Products	Green and edible cosmetic oil/serum based on Sacha Inchi oil rich in omega 3-6-9 and vitamin E for skin-barrier and anti-aging positioning.
Cosmetory	Commercial	Health Products	A research-based cosmetic line integrating Indonesian natural materials with a scientific approach to safety and efficacy.
Svarga	Commercial	Health Products	An edible oil based on Sacha Inchi oil as a plant-based omega source for healthy, halal, and sustainable daily consumption.
Bioscrub	Commercial	Raw Materials	A natural exfoliant derived from Sacha Inchi shells, supporting circular economy and sustainable cosmetics.
Vetachi	Commercial	Health Products	A veterinary product concept based on natural-ingredient research for animal-health support with an applied scientific approach.
